Research Information Sheet

Research Conducted by Dr. Mackenzie Alston of Florida State University and Dr. Sarah Jacobson of Williams College

Procedure and Compensation: You are being asked to voluntarily participate in a research study. This study involves a survey investigating how people were affected by the events of 2020 (mainly, COVID-19 and the social justice movement of 2020). This survey will take you approximately 15 minutes to complete.

If you complete the survey, you have the chance to win \$25 for you and \$25 for the charity of your choice. We will randomly select 50 winners.

You always have the option of voluntarily choosing not to participate and may exit the survey at any time.

Some but not all questions have a "Prefer Not to Answer" option. For all required questions without this option, you must answer the question in order to be eligible for the lottery. If you do not complete the survey (e.g., if you exit the survey early), you will not be eligible for the lottery.

Confidentiality: We are committed to protecting your identity. Your name and email address will not be linked to your survey responses when we analyze the data. Any file that connects your name or email address to your survey responses will be password-protected and accessible only to the research team. (Note: We need this file to contact people who indicate during the survey that they are interested in participating in a follow-up survey.) After the study is complete, this file will be deleted, and your data will be anonymized.

Your name will not be reported with any results related to this research. If data from this study is shared with other researchers in the future, no identifying information about you will be included.

We will store your information in ways we think are secure. We will store electronic files in computer systems with password protection. However, we cannot guarantee complete confidentiality.
